

Pan Tilt Driver

Designed for iCam

Exquisite work, water-proof, rust-proof and antiseptic

The screws and support stands are made of special metal, so the whole body is water-proof, rust-proof and antiseptic.

Remote control, smooth pan tilt and zoom

The director and monitor could control the Pan Tilt Driver through the Internet. It enable a 255° pan in the speed of 6°/sec, 12°/sec, or 20°/sec and a 60° tilt in the speed of 9°/sec.

Caring design, common power supply, and easy installation

Wall-mount design for Pan Tilt Driver. The caring design makes it possible to connect to the control socket and power source of iCam camera. Wiring and power supply are unnecessary. You can upgrade iCam as an all-round multifunctional camera.

Delicate stepper motor and codec

The internal components of the Pan Tilt Driver are delicate stepper motor and codec from Germany. They can make sure the Pan Tilt Driver is going steadily and positioning accurately.

A new generation of ABS material, refined outlook

The whole body of the Pan Tilt Driver is made of the latest ABS material. It is water-proof, dust-proof, and heat-resistant. Also, it has the high quality engineering plastic case. The beautiful exterior design is suitable for both indoor and outdoor.
